23. Problem: (use additional Sheets if necessary)
The Operating System for the PC previously procured for the NetApps replacement at GSFC and LaRC does not easily interface with the RAID attached to the Host. MS Project also required for LaRC ECS Manager's PC.

24. Proposed Solution: (use additional sheets if necessary)
It has been determined that a UNIX Operating System would be a better solution for configuring the RAID and it's partitions for file sharing and storage. M&O Engineering recommends procuring Linux Red Hat, version 6.2 UNIX Operating System to replace the Windows NT 4.0 Operating System currently on the two above Host machines. L aRC ECS Managers PC requires MS Project to maintain Project schedules and Timeline.

25. Alternate Solution: (use additional sheets if necessary)
None.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
By not procuring this software it will be difficult for the System Administrators to manage the file storage systems.
